

# Online Booking Engine

HiRUM's leading Accommodation Booking System and Hotel Booking Software will help you generate more direct bookings, with potential guests able to book with you directly, on your own fully responsive booking engine. Our solution integrates seamlessly with our Channel Management Software and Front Desk Property Management Software.

**No matter what device your guest uses to book, our fully responsive booking engine will automatically adjust to suit the required size for ease of use.**

- **Fully responsive booking system**, so your guests can book from phone, tablet or laptop; anytime, anywhere!
- **Increase your return** with higher rate of conversion
- Guests receive **immediate booking confirmation**; no waiting, no frustration
- **Easy for guests to use**
- **Increase the volume of direct bookings** to your website saving you Travel Agent commissions
- **Just 3 clicks** from Look to Book, improving customer experience
- Optional **payment gateway**, including PayPal
- **Style or embed** into your website to make the form your own

HiSITE Direct automatically reads the information directly from HiRUM Front Desk. Bookings are immediately and automatically dropped into your HiRUM Front Desk PMS System and updated on your website without you needing to do anything.

HiRUM Front Desk Property Management Software and HiSITE Book Direct Online Booking System work together to offer true last room availability. In today's online environment, prospective guests expect immediate access to make bookings, and with HiSITE Direct they get it!
